

REPORT MULTIPLIER EVENTS

EVENT TITLE: The role of the family caregiver in chronic diseases of adulthood

LEAD PARTNER: ANZIANI E NON SOLO

DATE: 14 June 14.30-17.30

VENUE: Online webinar

Event Identification: Multiplier Event

Country of Venue: Italy

Intellectual Outputs Covered and topics discussed:

During the Multiplier Event we present the project, the research and results of Intellectual Output 1 (IO1), the structured course of Intellectual Output 2 (IO2) and the realization of the pilot implementation referring Intellectual Output 3 (IO3). The session was divided into two parts: in the first part, we focused on kidney diseases and how they impact on the lives of caregivers and patients, sharing the work done during the Ecaris project. In detail, the speeches were:

- o Introduction, Licia Boccaletti, ANS
- Being caregiver of a person with chronic kidney disease: the interviews of the ECARIS project, Alessia Palermo, ANS
- ECARIS project: the training tools, Sara Beccati, ANS
- The management of the relationship between patient and caregiver in the context of kidney diseases, Dr. Giampietro Fusillo, Secretary ANED Emilia-Romagna Executive Committee Junod Denise, SIAN contact person for the Valle D'Aosta region

Subsequently, guests from Italy were invited to focus on other chronic diseases in which the role of the caregiver is crucial in the care of the patient. In detail:

WEBINAR SU PIATTAFORMA ZOOM Martedi 14 giugno 2022 - ore 14.30 - 17.30

Il ruolo del caregiver familiare nelle patologie croniche dell'età adulta

Il caregiving familiare è spesso associato a condizioni quali la demenza, il morbo di Parkinson o gravi disabilità. In realtà sono molto più numerose le patologie croniche dell'età adulta che implicano la necessità di un supporto di cura significativo da parte di membri della famiglia e possono avere un impatto rilevante su di essi. Partendo dai risultati del progetto Erasmus+ ECARIS che ha approfondito il ruolo del caregiver familiare nell'ambito delle patologie renali, in questo seminario esploreremo il significato del prendersi cura in diverse patologie croniche dell'età adulta.

- The role of the caregiver in the management of the patient with hepatic encephalopathy the project of ASL 3 Liguria, Patrizia Balbinot, Referent for associations and caregivers of the Regional Alcological Centre of Liguria
- Being caregiver of a person with HIV or AIDS, ASA97 Association

The caregiver in rheumatic diseases, Maria Grazia Pisu, President ALOMAR ONLUS

At the end of the event, questions and interventions were taken from the audience, who were partly from the health sector and partly informal caregivers. Various forms of appreciation for the project were expressed, as well as interest in the online platform.

Dissemination material distributed:

An invitation card was published online through social media and it was send directly to stakeholders by email to attend the ME.

Number of Participants:

57 people registered for the event, 52 of whom participated throughout its duration. These stakeholders were: social workers, nurses, health and social workers, elderly centre operators, caregivers and the general public. The involvement of many professionals represented a strong opportunity in terms of multiplication of results, as they were keen to promote the online platform among their clients.
